Table of Contents

Explanation of Perpetual SY9 License 3

 Terminology of SY9 License Document..... 4

Support..... 4

Applicable To: **Liquid UI Client for SAP Android Version 4.0.13.0 and below**

This document is applicable when installing, licensing and configuring Liquid UI for Android when no access to Google Play Store is available from the device and no internet connectivity is available to connect to Liquid UI licensing Portal for licensing and management of the device. A SY9 license file will be provided which will be specific to each device that needs to be licensed.

Explanation of SY9 Enterprise Production Edition License

Synactive's perpetual license allows the Licensee to use the software for as long as the Licensee/end user complies with all terms of the license agreement. The end user is required to pay for maintenance annually. As long as the user pays maintenance, they have a right to upgrade to any version of the software that is released during the maintenance period.

Licensee must pay Synactive's then annual fee in order to continue Product Technical Support and Update Rights for the Software, its versions and its documentation.

Not paying maintenance will result in loss of rights to any subsequent upgrade versions, (including online store downloads) and loss of any Synactive support. If there is a maintenance lapse, returning to maintenance in any given year will require payment for that year and a negotiated amount for each of the years of the maintenance lapse including penalties.

Upon paying maintenance, a new SY9 license will be generated with the upgrade validity/maintenance to date extended based on the number of years of paid maintenance.

Terminology of SY9 License Document

For the purpose of SY9 Perpetual production Licenses, **Valid Till/Expires in** date specified means **Upgrade Validity/Maintenance To** date, and is used interchangeably in any type of communication.
