

Configuration of Message Server on Liquid UI Android

Purpose:- Connecting to Message Server using Liquid UI Android.

Environment:-

SAPGUI 7.40, Patch Level 0

Sample SAPGUI Connection:

The screenshot shows the 'System Entry Properties' dialog box with the 'Connection' tab selected. The dialog has three tabs: 'Connection', 'Network', and 'Code Page'. The 'Connection' tab contains a text box with instructions: 'Choose the connection type and change the system parameters as required. Delete the old description if you want the system to propose a description. Button 'OK' is only active when all required input data has been entered.'

Below the instructions, there is a 'Connection Type:' label and a dropdown menu showing 'Group/Server Selection'. Below this is a 'System Connection Parameters' section with several fields:

- Description: A text box containing 'DESC'.
- System ID: A dropdown menu showing 'TRX'.
- Message Server: A text box containing 'JUNEAU'.
- SAProuter: A dropdown menu.
- Group/Server: A dropdown menu showing 'DESIGNER'.
- Instance Number: A text box.

At the bottom of the dialog, there are three buttons: 'OK', 'Cancel', and 'Help'.

Environment:

Liquid UI Android version 2.0.23.0

Sample LiquidUI Android Connection:

CONNECT TO MY SAP

To Configure Message Server on Liquid UI Android Provide your SAP Server Information and Click on **CONNECT TO MY SAP**. We need to Provide Message Server in below Format:

/M/JUNEAU/S/3600/G/DESIGNER

M -> Stands for Message Server

Juneau -> Message Server Name

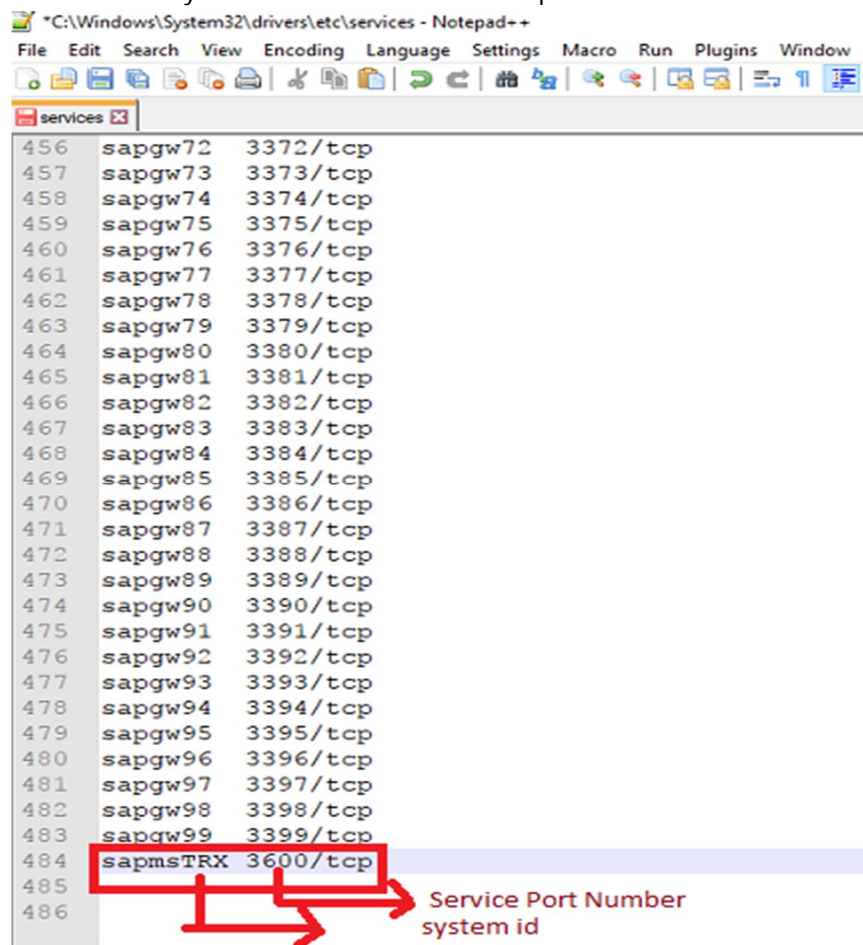

S -> Stands for Service Port Number

Service Port Number is found in "services" file at below path on Machine Configured with Message Server

C:\Windows\System32\drivers\etc

Eg:- sapmsTRX 3600/TCP

TRX is the SAP SystemID and 3600 is the service port number.

G -> Stands for Group Name

DESIGNER -> Name of the Group
