

## Set Toolbar Height on Liquid UI IOS

### Prerequisites:

1. Installation of Liquid UI app on the IOS device.
2. Connection to SAP R/3 Server (even demo.guixt.com can be used).

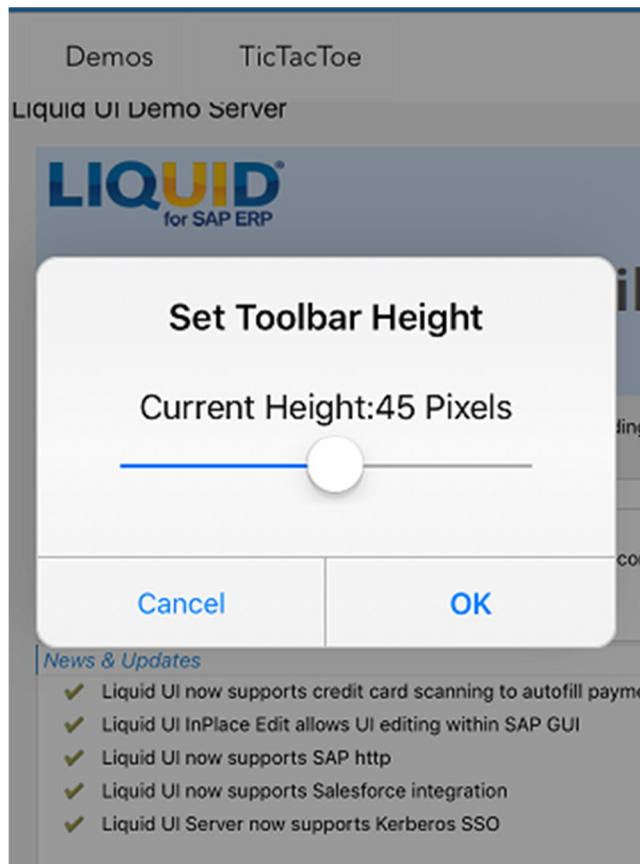

### Steps to Set Toolbar Height for Liquid UI IOS:

- > Login to the SAP R/3 connection.
- > Select the right bottom corner of the screen @ SAP Server Name.
- > A bubble with a list of entries pop's up.

- > Tap on "Set Toolbar Height" entry.

-> Another pop up appears with a Scale to set the height in pixels.

-> Move the pointer on scale to set desired height and click "OK".

-> Toolbar height is changed on Liquid UI IOS.
