

Automatically Adding Server Connection on Liquid UI Android by Scanning QR Code

Purpose:

Liquid UI Android provides a useful and efficient feature to add the Server connection on to the connection list of Liquid UI Android, with the help of Scanning QR Code generated by the “Connection Transmitter” executable, which is provided with Liquid UI SDK. This feature will replace the need of adding the server connection manually on to the connection list.

Steps:

1. Run the file “Connection Transmitter.exe” as an administrator on your windows machine. The following window will be generated with a list of connections fetched from your SAP Connection list. Now click on the desired connection.

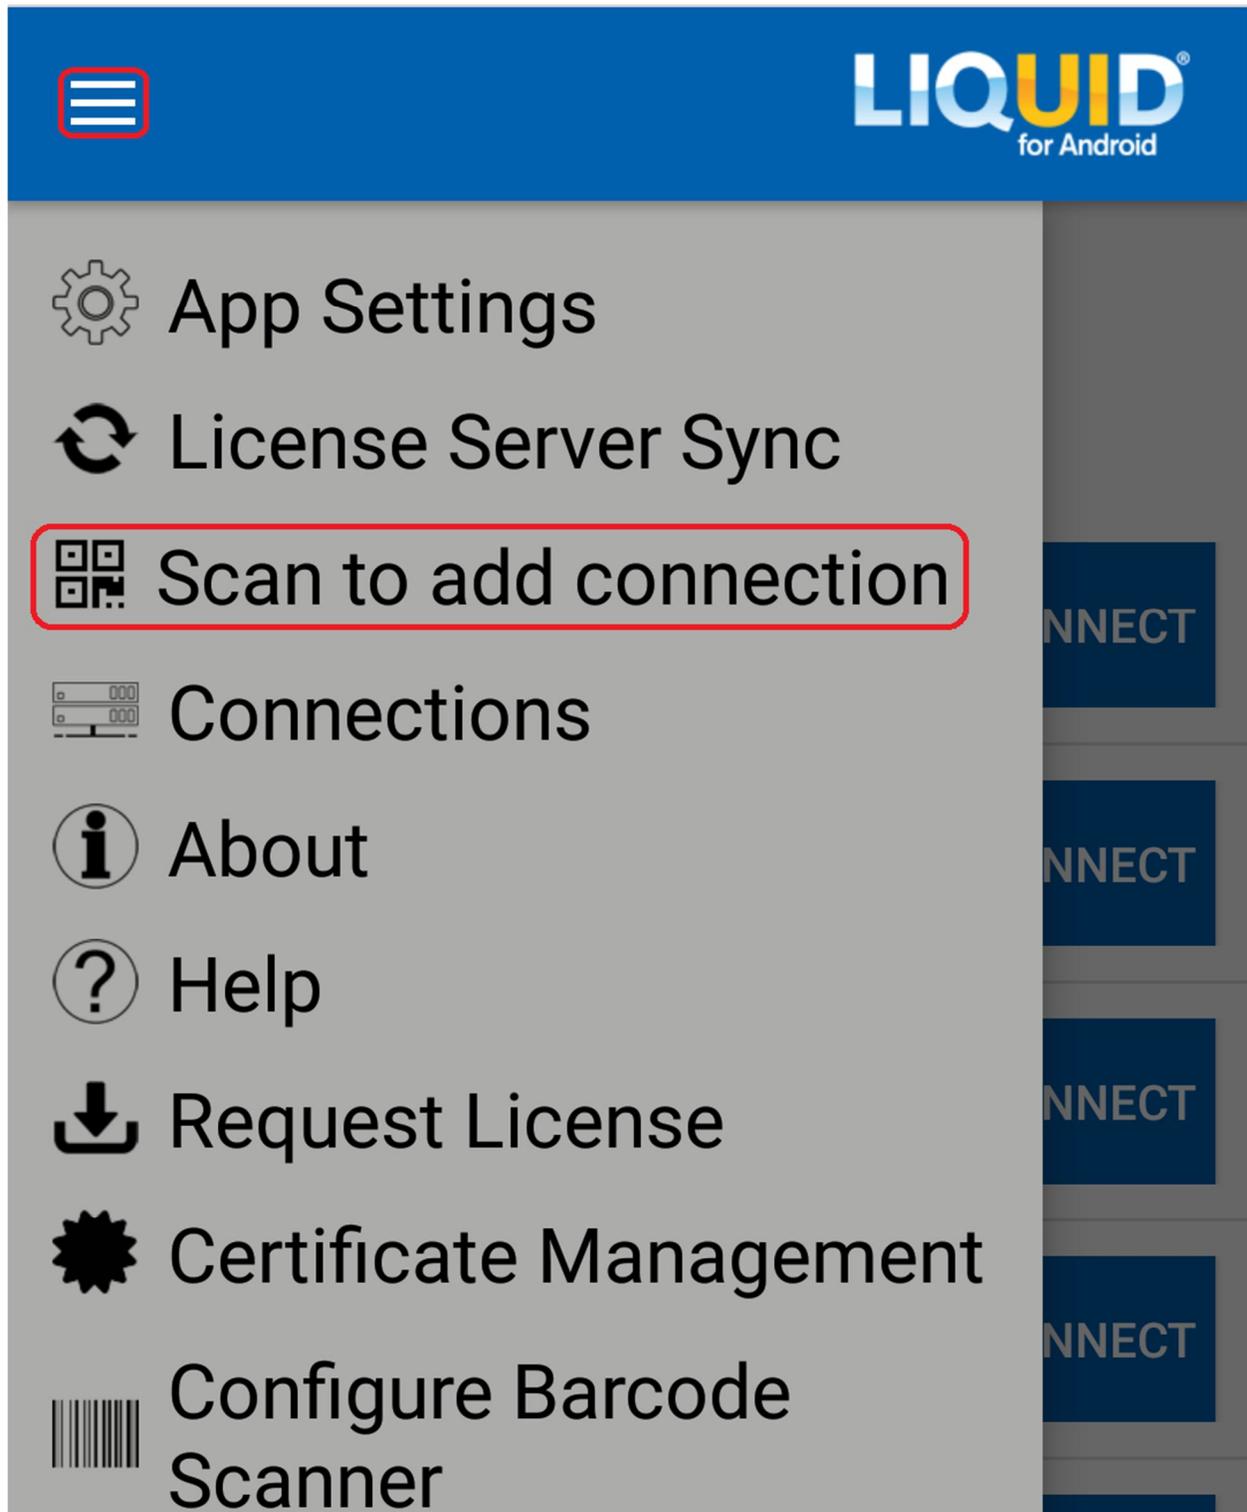

The screenshot shows a window titled "LIQUID for SAP ERP Connection Transmitter". It contains a table with the following data:

Connection Name	IP Address	Port
production-EXT	172.16.213.20	24
QWALITY EXT	192.168.30.00	00
external -EXT	172.16.214.06	28
liquidui server	localhost	05

2. A QR Code will pop-up on your machine.

3. Now open Liquid UI Android and navigate to the option “Scan to Add Connection” under settings.

4. The camera will start allowing you to scan the QR Code generated by “Connection Transmitter”. Once scanned the connection will be automatically added to the connection list with the success message.

The screenshot shows the LIQUID for Android app interface. At the top, there is a blue header with a hamburger menu icon on the left and the LIQUID for Android logo on the right. Below the header, the text "SERVER CONNECTIONS" is centered. A list of server connections is displayed, each with a three-dot menu icon on the left, a description, a status, and a "CONNECT" button on the right. The connections are: TEST, TESTQ, liquidui server, test1, and test5. The "liquidui server" entry is highlighted with a red border. At the bottom of the screen, a blue banner contains a dark grey rounded rectangle with the text "Profile added successfully", also highlighted with a red border.

	Description	status	
⋮	TEST	INACTIVE	CONNECT
⋮	TESTQ	INACTIVE	CONNECT
⋮	liquidui server	INACTIVE	CONNECT
⋮	test1	INACTIVE	CONNECT
⋮	test5	INACTIVE	CONNECT

Profile added successfully
