

Enabling or Disabling InputField History on Liquid UI IOS

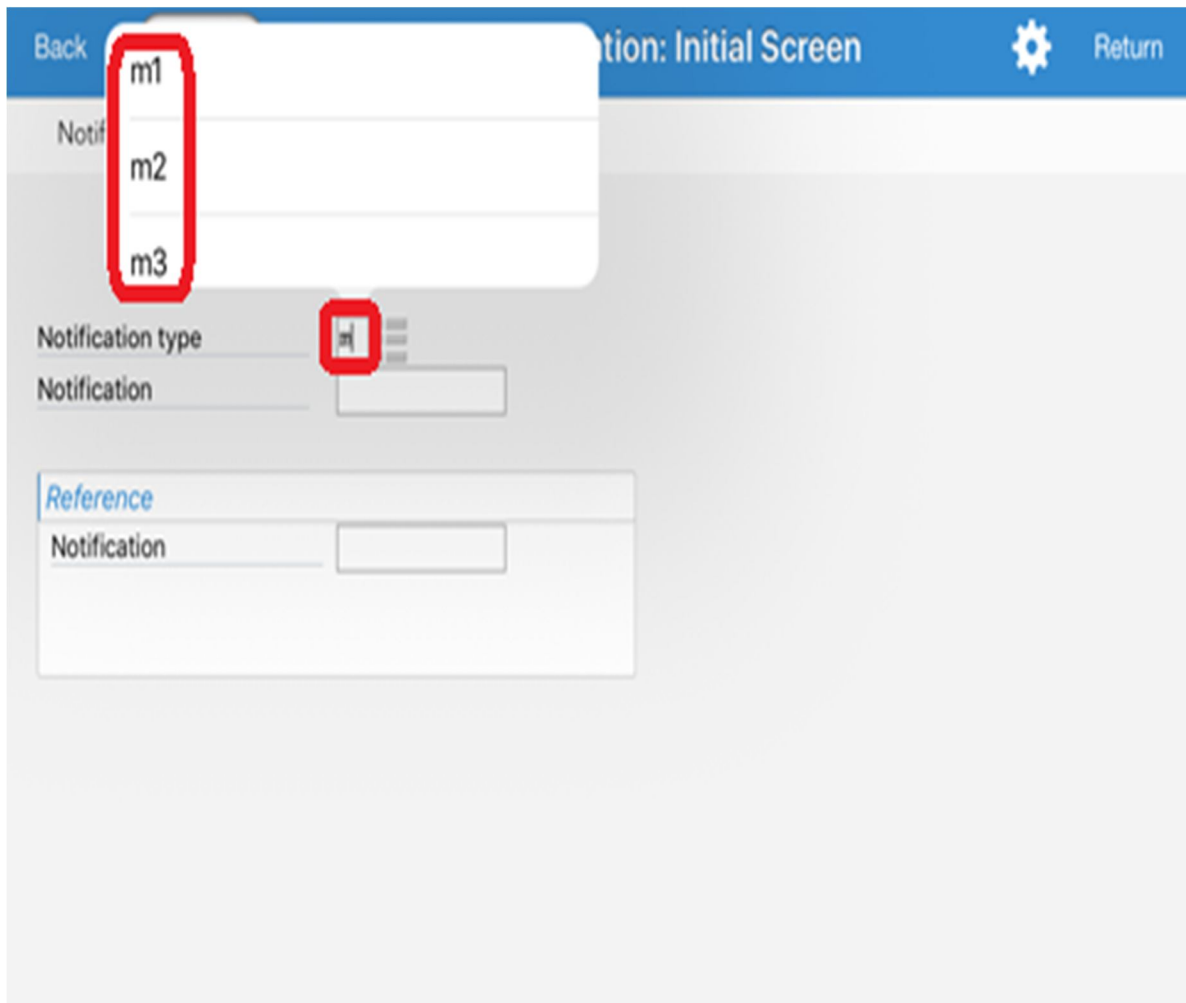

Purpose:

Using this option users can **show** or **hide** the user input history within the **inputfields**.

Example Steps:

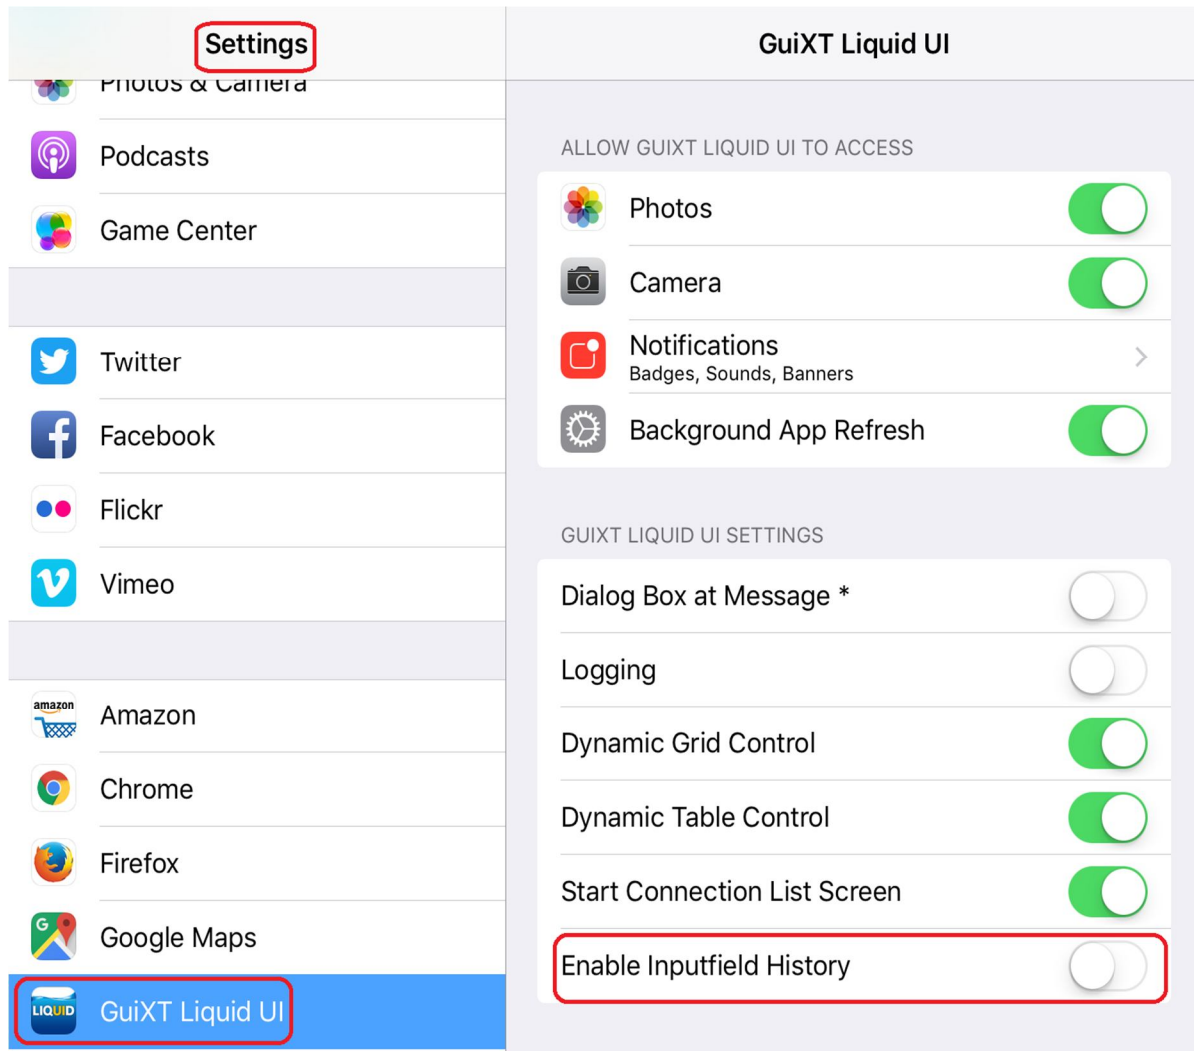

Step 1: Open a session and Navigate to the transaction IW21 then enter the necessary value within the desired inputfield.

Step 2: A **bubble** with similar suggestions to choose from user input history will **popup** on the inputfield.

Step 3: Navigate to the App Settings on the IOS Device to **Disable** the user input history.

Settings → GuiXT Liquid UI → Enable Inputfield History

Step 4: Navigate back to the transaction and **close** the session for the changes to take effect.
