Horizontal and Vertical Scrolling on Listscreen using WS

Below example, explains the scrolling on listscreen in both horizontal and vertical directions using WS functions.

Horizontal scroll syntax:

enter("/hscrollto=x");

x - specifies number of columns to scroll

Vertical scroll syntax:

enter("/scrolltoline=y");

y – specifies the number of rows to scroll

Liquid UI Code:

//////////////////////////////// RVKRED01.E0120.sjs ////////////////////////////////

pushbutton([TOOLBAR], "Scroll Horizontal",{ "process": z_HorScroll }); // pushbutton to call z_HorScroll function

pushbutton([TOOLBAR], "Scroll Vertical",{ "process": z_VerScroll }); // pushbutton to call z_VerScroll function

```
function z_HorScroll(){ // function to horizontal scrolling on listscreen

        onscreen 'RVKRED01.0120'

                enter("/hscrollto=20");

}
```

```
function z_VerScroll (){// function to vertical scrolling on listscreen

        onscreen 'RVKRED01.0120'

                enter("/scrolltoline=10");

}
```
