

## Passing Parameters to onUIEvents

### Process:

To pass parameters to onUIEvents command with the 'using' option.

In below example we will pass order number as parameter to a liquid UI function with using option which is triggered by "onUIEvents" command.

### **LiquidUI Code:**

```
//////////////////SAPLSMTR_NAVIGATION.E0100.sjs//////////////////  
onUIEvents['Enter']={"fcode":"/nva02","process":test_UIEvent, "using": {z_ord_no:5455}};  
function test_UIEvent(param){  
    onscreen 'SAPMV45A.0102'  
        set("F[Order]" , param. z_ord_no);  
        enter();  
    onscreen 'SAPMSDYP.0010' // to handle information pop up if encountered  
        enter();  
    onscreen 'SAPMV45A.4001'  
        enter();  
}
```

On click "Enter", screen navigates to overview screen of "VA02" t-code with details of order number passed as parameter.
