_list System Variables

_listfirstvisiblecol:

Specifies the position value of the first column of a list screen visible to the user.

__listlastvisiblecol:

Specifies the position value of the last column of a list screen visible to the user.

_listtotalwidth:

Specifies the actual width of the list screen.

_listdatawidth:

Specifies the width of the listscreen visible to the user.

LiquidUI Code:

Below code demonstrates the usage of above system variables on VKM1 transaction.

-------------------------- RVKRED01.E0120.sjs -----------------------------

//To display the position value of the first column visible

println("------First visible col is--------" +_listfirstvisiblecol);

//To display the position value of the last column visible

println("------Last visible col is--------" +__listlastvisiblecol);

//To display the actual width of the listscreen

println("------Total width of the list screen is--------" +_listtotalwidth);

//To display the width of the listscreen visible to the user

println("------Data Width of the list screen is---------" +_listdatawidth);
