

Using viewhelp with Image command

Purpose:

To display the html file using viewhelp option of Image command.

Below code demonstrates the usage of viewhelp option to display the html file in Image command on VA01 Initial screen.

LiquidUI Code:

```
----- SAPMV45A.E0101.sjs -----  
image([12,2], "test1.jpg" ,{"viewhelp":"liquidui.html", "viewhelp_width":35,  
"viewhelp_height":10, "viewhelp_position":[12,30]});
```

Following is the html code used to demonstrate the same.

HTML Code:

```
<html>  
<head>  
<title>LIQUID UI</title>  
</head>  
<body>  
<ol>  
<li>  
<a href="http://www.guixt.com">Customizing SAP ERP</a><br>  
<li>  
<a href="http://www.guixt.com/products">Liquid UI Products</a>  
</ol>  
</body>  
</html>
```

Result Screen:

Create Sales Order: Initial Screen

☐ Create with Reference  Sales  Item overview  Ordering party

Order Type

Organizational Data

| | |
|----------------------|----------------------|
| Sales Organization | <input type="text"/> |
| Distribution Channel | <input type="text"/> |
| Division | <input type="text"/> |
| Sales Office | <input type="text"/> |
| Sales Group | <input type="text"/> |
