

Demonstrating Signature feature using SFO on Liquid UI Android

Purpose:

This feature helps the user further validate the report by uploading their signature in key business scenarios as proof of authentication.

Example:

1. Navigate to any transaction which has SFO like IW24.
2. To the top right corner on the screen, one will see SFO - symbolically a paper clip, Hence Tap on it to select the option “Create Attachment”.

3. Select the option “signature” from the pop-up list.

Services for Object

- ☐ Select File
- ☐ Take a picture
- ☐ Select Image
- ☒ Signature

DISMISS

4. Draw the signature within the empty area and click on “Done”.

Smartfile

Please sign above

CLEAR

DONE

5. Enter the file name for signature and click on “Done”.

Services for Object Upload

Please provide the Filename to be associated with this operation.

File name

CANCEL

DONE

6. A success message will appear on the screen.

The screenshot displays the 'LIQUID Create...' application interface. At the top, there is a header bar with a menu icon, the 'LIQUID Create...' logo, and icons for search, attachments, and editing. Below the header is a toolbar with various icons and a prominent green 'SAVE' button. The main form area contains several input fields: a text field with '10005939', a dropdown menu set to 'M2', an 'OSNO' field, and an 'OPEN' button. Below these are three large circular icons labeled 'Reference object', 'System availability', and 'Location'. The bottom section of the form includes a date field labeled 'Notif.date' with the value '21.12.2'. A red rectangular box highlights a success message at the bottom of the screen: 'S The attachment was successfully created'.
