

Liquid UI: Dropdownlist

dropdownlist command (also called combobox) creates or modifies dropdown lists on SAP screens.

Navigate to MM01 transaction

Industry sector dropdownlist can be restricted to only 3 values

```
set("V[mylist]", "---- Select Industry Type ----;B=Beverage;C=Chemical Industry;M=Mechanical Engineering;");  
dropdownlist([10, 0], "mylist", {"refer": "F[Industry sector]", "width": 30});
```

Actions can be triggered using dropdownlist. Once an action is triggered, set command can be used to populate the values chosen to other controls or screens . Selecting Mechanical Engineering from the new dropdown list will trigger the process

```
set("V[mylist]", "---- Select Industry Type ---;B=Beverage;C=Chemical Industry;M=Mechanical Engineering;");
dropdownlist([10, 0], "mylist", {"refer":"F[Industry sector]", "width":30,"process":test_dropdown});

function test_dropdown(){
    set("F[Industry sector]", z_ordertypeselected);
    set("F[Material Type]", "FERT");
    enter();
}
```

Liquid UI Code [Script]
