

Language Localization

Purpose:

To allow users change the default language of the APP from English to Korean, Japanese, Spanish.

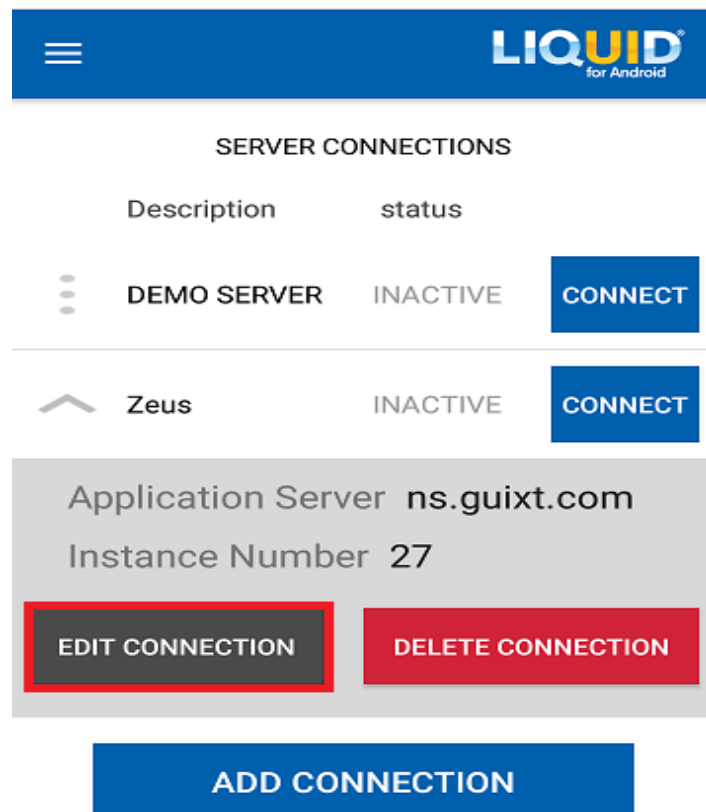

Procedure:

There are two methods for changing language.

A. Changing language before navigating to login Screen.

Example Steps for Changing language to Spanish:

1. Navigate to “Edit Connection” for particular server on the server connections screen.

2. Enter language as “ES” and turn the “Auto Logon” as “ON” and click on “CONNECT TO MY SAP” to update the information.

4. On the Login screen, enter “ES” for “Logon Language” and Click on “Return”.

The image shows the SAP Liquid login interface. At the top, there is a header with a menu icon, the 'LIQUID' logo, and the 'SAP' logo. Below the header, there is a 'New password' section with a red 'RETURN' button. The main login area contains four input fields: 'Client' with the value '800', 'User' with the value 'Test', 'Password' with masked characters, and 'Logon Language' with the value 'ES'. The 'Logon Language' field is highlighted with a red box. On the right side, there is an 'Information' section with the text 'Welcome to Edition 2 (20'.

Result:

The language is now changed to Spanish.

The screenshot shows the LIQUID CREAM application interface in Spanish. The header features the LIQUID logo, a search icon, and a key icon. The main title is "CREAR pedido de cliente" with an "Acceso" button. Below the header, there are three tabs: "Crear con referencia", "Ventas", and "Res". A "CONFIRMAR SELECCIÓN" button is visible on the right. The main form area includes a "Clase de pedido" dropdown menu and a section titled "Datos organizativos" with five input fields: "Organización ventas", "Canal distribución", "Sector", "Oficina de ventas", and "Grupo de vendedores".

Note:

If you are selecting language while logging in, it will be applied to the current session only, and you'll have to enter it again the next time you log in.
