

Liquid UI: File Handling

This is a basic example of opening a file, appending to it, and then closing the file. In this example we use a .txt file however you can use .csv and .xls as well.

User Interface

Log into SAP and on the Easy Access screen, the script will run. Initially, our .txt file will be blank but after the script runs, we should see the following:

Liquid UI Code [Script]

```
SAPLSMTR_NAVIGATION.E0100.sjs [3]

7
8 // Open the file up
9 openfile("filenames.txt", {"delimiter": ";", "output": true});
10 name1 = "John";
11 name2 = "Nancy";
12 name3 = "Alexander";
13 // Append to the file, set the variables you want to carry over as true
14 appendfile("filenames.txt", {"name1": true, "name2": true, "name3": true});
15 // Always close the file after
16 closefile("filenames.txt");
```
