

Liquid UI: Passing values between sessions

Values can be passed between sessions as a parameter by using "using" option.

```
pushbutton([TOOLBAR], "Pass Values", "/oiw31", {"process":open_new_session, "using":{"z_order_type":"PM01" }});
```

Click on Pass values button on toolbar to pass order type value in a new session

A screenshot of the 'Create Order: Initial Screen' form. The form has a light blue header with the title 'Create Order: Initial Screen'. Below the header, there is a 'Header data' section with a refresh icon. The form contains several input fields: 'Order Type' (with a dropdown menu showing 'PM01'), 'Priority' (with a dropdown menu), 'Func. Loc.' (with a text input), 'Equipment' (with a text input), 'Assembly' (with a text input), 'Plng plant' (with a text input), and 'Bus. Area' (with a text input). To the right of these fields, there is a vertical stack of three icons: a green checkmark, a red X, and a blue information icon. At the bottom of the form, there is a 'Reference' section with a table containing one row: 'Order' with a text input field.

Load functions in esession file

```
load('functions_iw31.sjs');
```

```
function open_new_session(param) {  
  onscreen 'SAPLCOIH.0100'  
  set('F[Order Type]', param.z_order_type);  
  enter('?');  
}
```
