Installation of Liquid UI license for Android
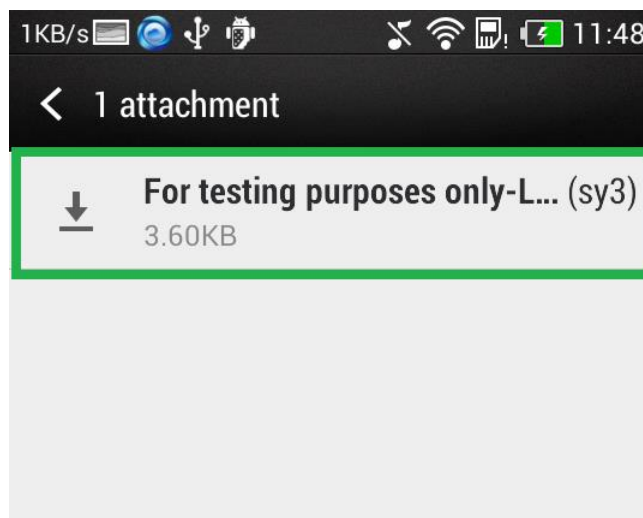

Pre-Requisites:

1. Liquid UI app should be completely closed on the Android device.
2. Liquid UI license should be in the email that is configured in the Native email app of the Android device.

**Steps to Install Liquid UI license on an Android device**

1. Open the mail which contains the license attachment on you Android device.
   Note: Please use the native mail application instead of using a browser application.

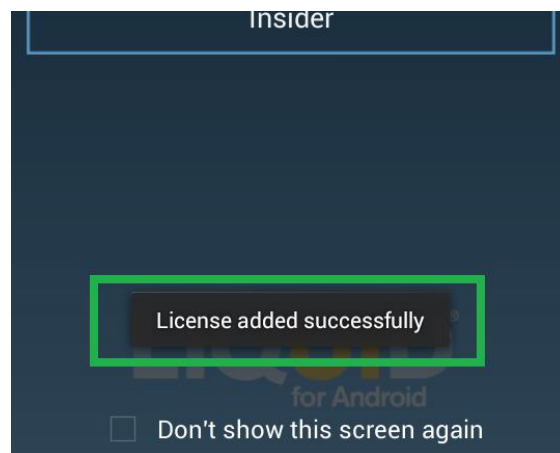

2. Click on the .sy3 attachment and start to download the license file.

3. Once the license is downloaded, click on the attachment.

4. It will automatically open up the LiquidUI application and have the license imported.
   Note: You should see a message as below after the license is imported.

5. For validation of License, click "Insider" at menu screen then scroll down to license information
