

Installing Mobile on a Handheld Device

1. Installation

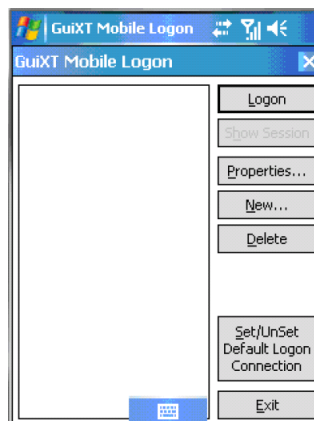

GuiXT Mobile does not employ an install wizard, so the installation process will be performed manually. To install the Mobile client on a supported handheld device, please do the following.

Note: You must have **Microsoft ActiveSync / Windows Mobile Device Center** (MAS/WMDC) installed in order to complete the installation. MAS/WMDC can be obtained from www.microsoft.com.

1. Save the ZIP file provided to you by a Synactive Sales or Support representative to the target system's hard drive. The file is named 'GuiXTMobile.zip' and contains the following files:

Mob-CE.exe	This file is used for certain specific installations. You will not use this file unless otherwise instructed by a Synactive Support representative.
Mob-CEx86.exe	This file is used for certain specific installations. You will not use this file unless otherwise instructed by a Synactive Support representative.
MobPPC03up.exe	This file is the one you will use for a production installation of the GuiXT Mobile solution.
Mob-SymbolCE.exe	This file is used for certain specific installations. You will not use this file unless otherwise instructed by a Synactive Support representative.

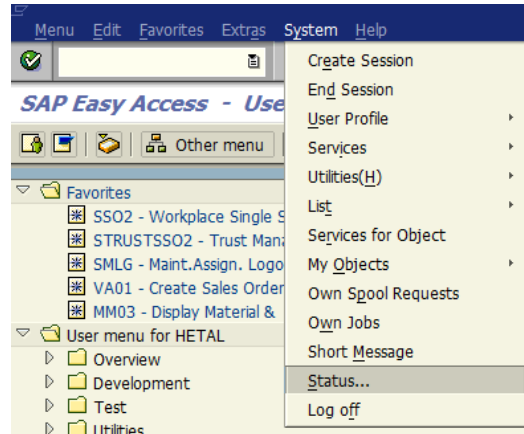

2. Unzip the GuiXTMobile.zip to a location of your choice.
3. Launch MAS/WMDC and connect to your device. When the device is connected, click the Explore button in MAS/WMDC and navigate to the Program Files directory on the device.
4. In the Program Files directory, create a new folder called 'Synactive' and then create a 'GuiXTMobile' sub folder.
5. Use MAS/WMDC to copy the correct versions of both the 'GuiXTMobile.exe' and the 'license file to the new 'GuiXTMobile' directory on the device.
6. Create a shortcut, name it 'GuiXTMobile' and paste it into the device's \Windows\Start Menus\Programs directory.
7. The entry for GuiXT Mobile should be visible in the device's Start > Programs directory. However, do not launch the application. Launching GuiXT Mobile before the license is installed will result in an error message.
8. Proceed to the [licensing](#) section and install the license.
9. Launch GuiXT Mobile. The Logon Pad will display as shown below.

2. Licensing

To generate a trial license, we will require the SAP installation number and SAP System ID. Please follow the steps below to provide this information:

1. Login to your SAP GUI from the desktop.
2. Click on the System menu on the top right.
3. Select the Status option from the dropdown menu.

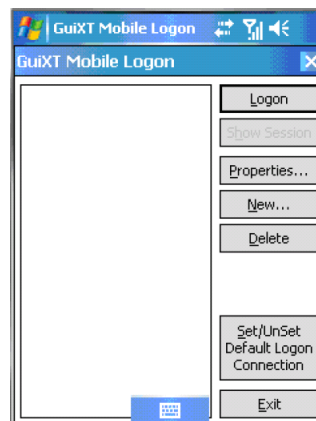

4. Please send us a screenshot of the Status Windows that pops up

2.1 Installing License:

Once your license is approved, Synactive will send it to you as an email attachment. To install it, please do the following.

1. Copy the file you receive from Synactive to the GuiXTMobile folder on the device where the application resides, using MAS/WMDC.
2. Go to **Start > Programs > GuiXTMobile**.
3. An empty GuiXT Mobile logon pad will appear as shown below.

4. Click **New** to create a new connection.
5. Enter the appropriate information for a new connection.
