

Dark Mode for Liquid UI Android

Purpose: To make it easier for the user to use the application in a low-light environment.

Pre-requisites: Liquid UI Android version 4.0.12.2.

Steps:

1. Launch liquid UI Android App and from the Options Tap on (≡) Menu, Tap on App Settings.

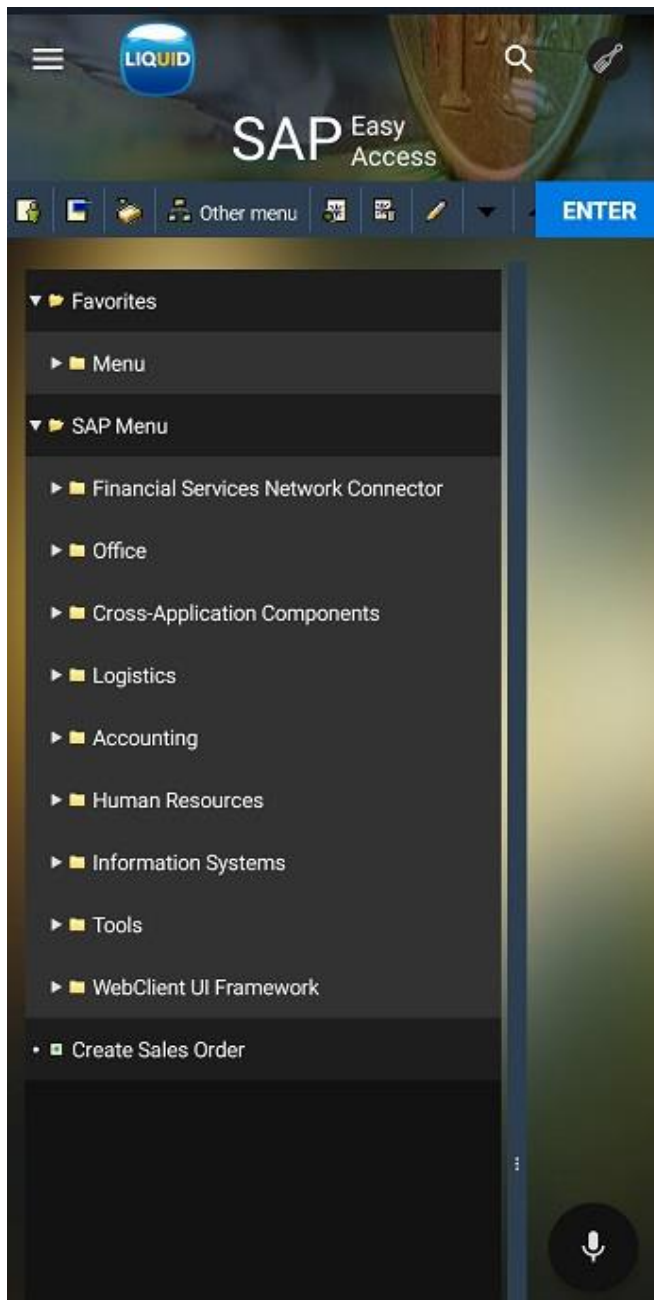

2. For Dark Mode Option, tap on “Always on”.

The screenshot shows the 'LIQUID Insider' settings application. The settings are organized into sections separated by horizontal lines. The 'Dark Mode' setting is currently set to 'Always OFF'. A dropdown menu is open, showing three options: 'Always OFF', 'Always ON' (which is highlighted with a red rectangle), and 'Automatic'. The 'Table Layout' setting is partially visible with the text 'Real'.

Setting	Value
Keep SAP Screen On	ON
Show keyboard on focus	OFF
UI Assist	ON
Background Image	
Text Color	
System Message Style	
Screen Layout Setup	
System Message Icon	
Default Printer	
Table Layout	Real
Dark Mode	Always ON
Theme	LiquidUI5

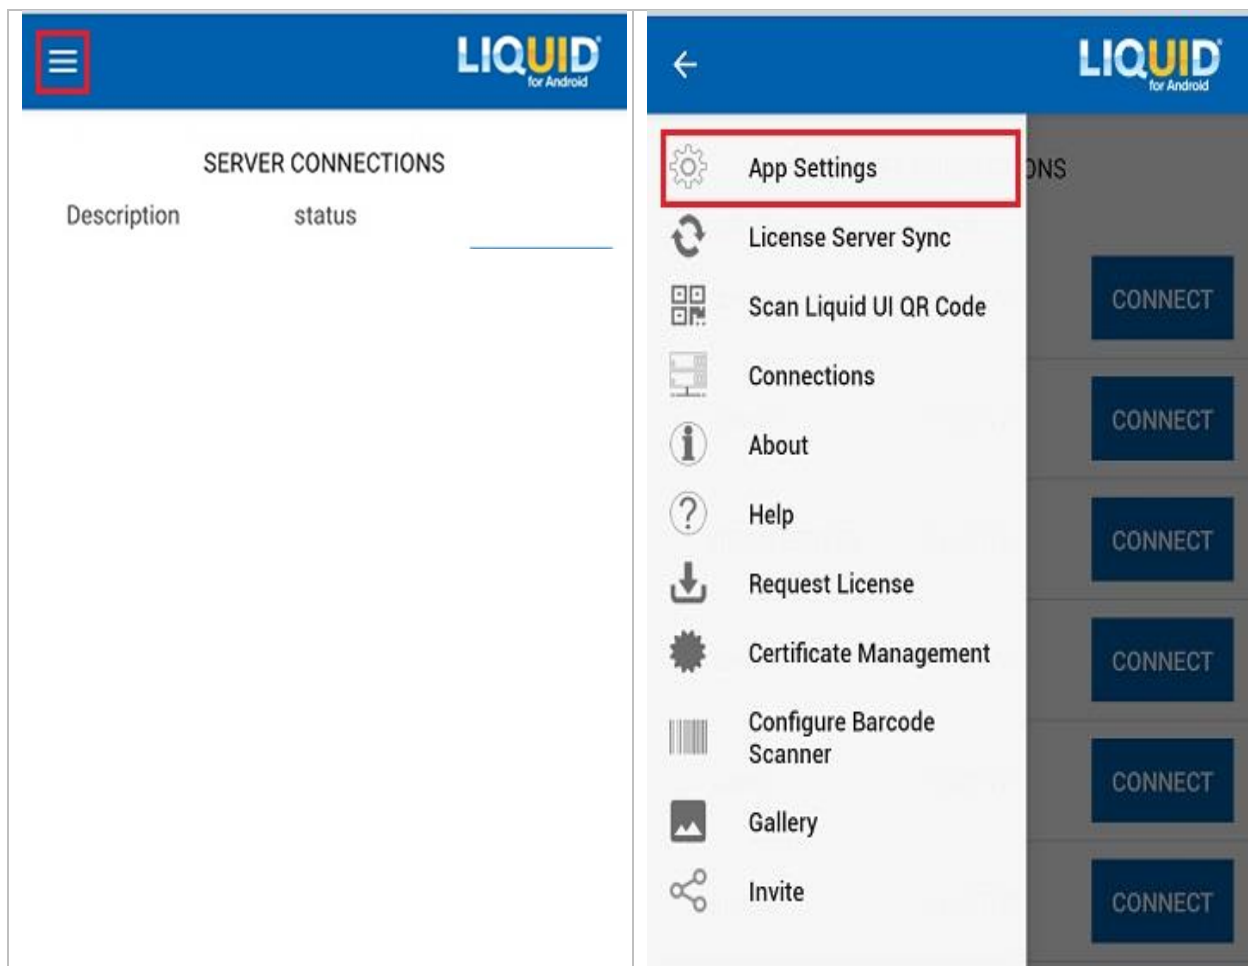

3. Now the Complete Application will change into Dark Mode.

Result: SAP Easy Access Screen

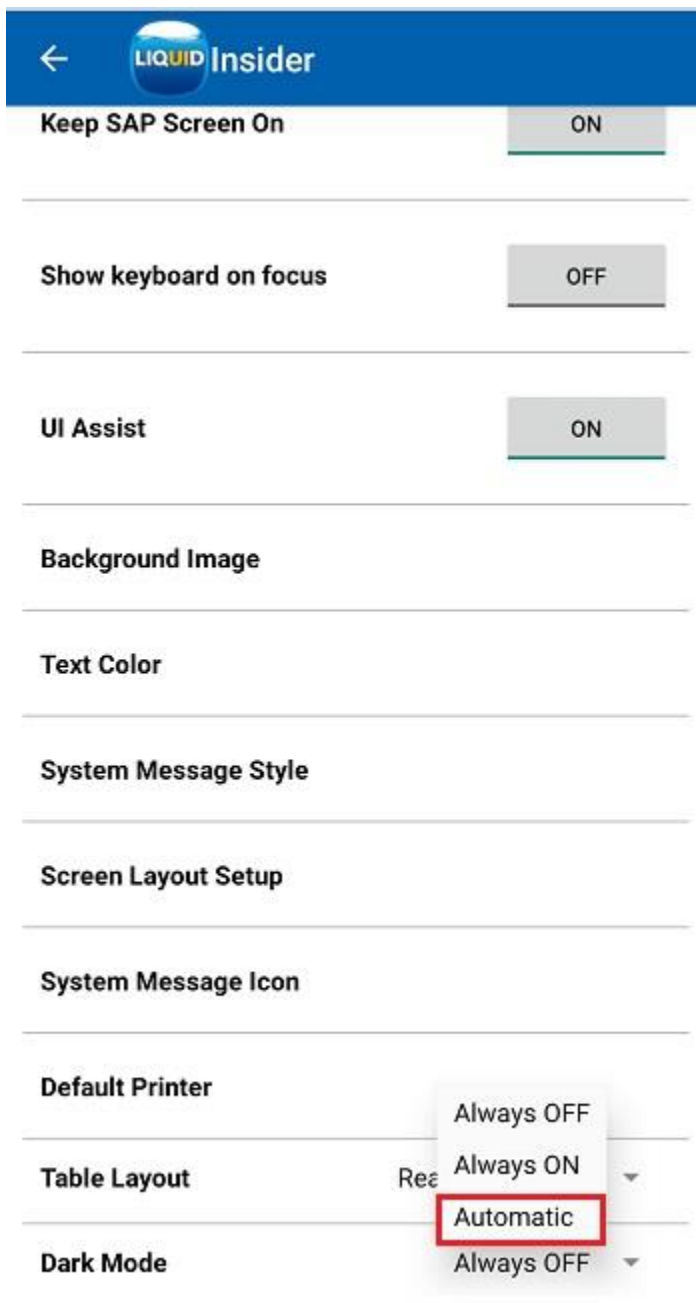

Automatic Option:

1. By enabling the Liquid UI App Dark Mode setting to Automatic. the Liquid UI App takes the Dark mode settings of the Android device and will apply those settings accordingly to itself. This will help the user not to change the Dark mode setting frequently with in the App if the user prefers to have the Dark Mode settings within the device applied to the Liquid UI App automatically.
2. This automatic option is available for Android devices OS version 10 and higher.
3. Launch liquid UI Android App and from the Options Tap on (≡) Menu, Tap on App Settings.

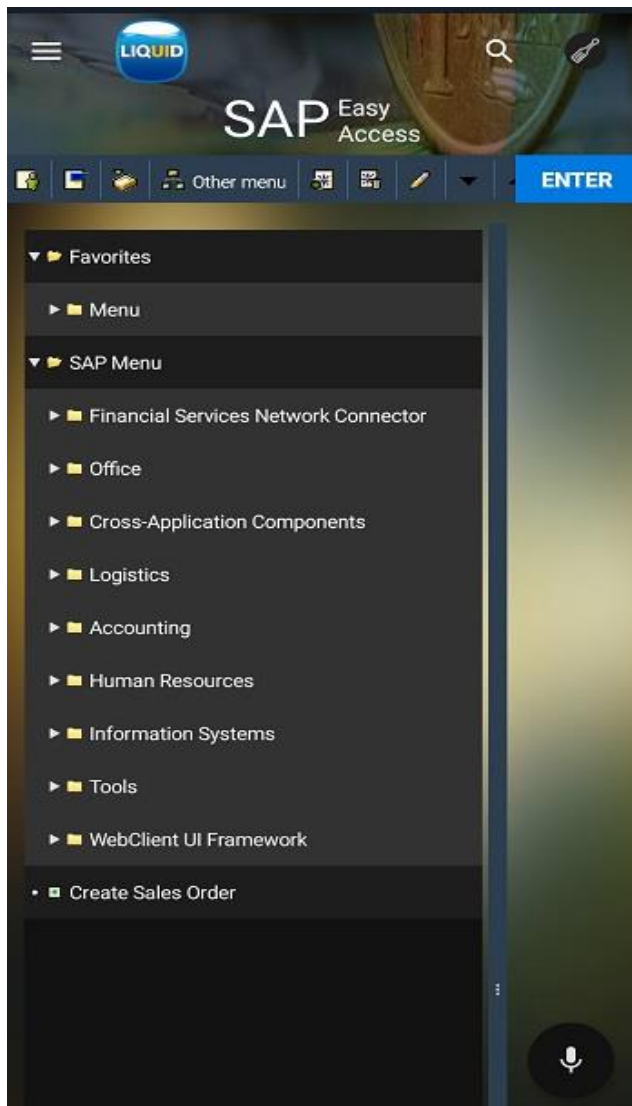

4. For Dark Mode Option, tap on “Automatic”.

5. Use the system setting (Settings -> Display -> Dark mode) to enable Dark mode.

Result: Now the Application will change into dark mode as we choose Automatic.

Note: The text color within the Liquid UI app is set to default as black, then after changing the Dark Mode, the text color will change to white. Similarly, if it is on Red without Dark Mode, after changing to Dark Mode, the text color will become Blue.

To check further how to change the text color within the Liquid UI App, please follow the below article.
