

Liquid UI pushbutton's "eventid" parameter with "_eventid" system variable

Purpose:

To use the "eventid" parameter of pushbutton and conditionalize the script with help of "_eventid" system variable for displaying the event.

Pre-Requisites:

1. Liquid UI WS version 1.2.332.0 & above.
2. Liquid UI WS Server version 3.5.572.0 & above.(if accessing scripts via WS Server)

Syntax:

```
pushbutton([2,4], "name of button",{ "eventid":"event name"});
```

Liquid UI Code:

Below code demonstrates the usage on SAP Easy Access Screen.

```
----- SAPLSMTR_NAVIGATION.E0100.sjs -----  
del("X[IMAGE_CONTAINER]");  
pushbutton([2,4], "Order",{ "eventid":"book"});  
pushbutton([2,15], "Exit",{ "eventid":"leave"});  
if(_eventid=="book")  
{  
    message('You are about to confirm the order',{ "title":"Confirmation","type":64});  
}  
if(_eventid=="leave")  
{  
    message('You are about to leave the page',{ "title":"Exit","type":64});  
}
```
