

Creating Pushbutton Inside Liquid UI Table

Purpose:

Below Article would help in creating pushbutton inside the Liquid UI Table Column using Liquid UI WS.

Pre-requisites:

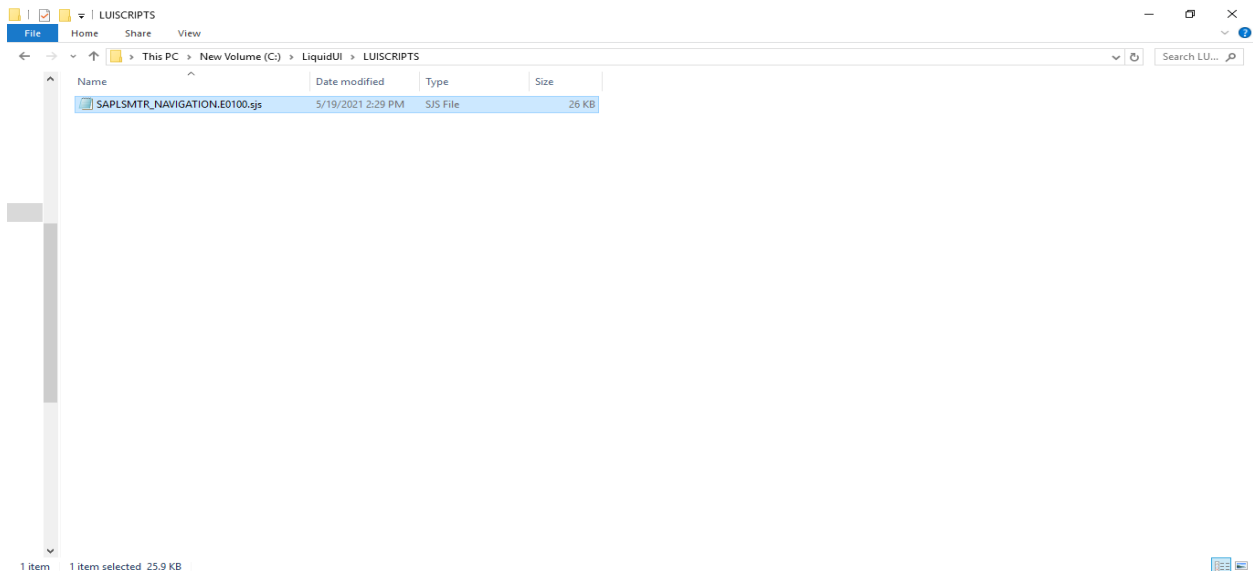

Liquid UI WS

Example:

Following are the steps needs to be followed:

Step-1: Open the Easy Access Script file "SAPLSMTR_NAVIGATION.E0100.sjs" which can be found in the directory folder as Configured in the "guixt.sjs" file.

Create the file if it doesn't exist.

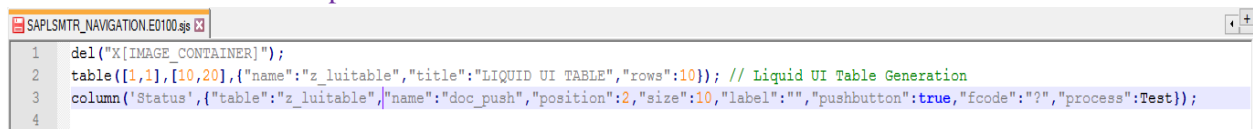

Step-2: Add the below code snippet and save it.

//Liquid UI Code:

```
del("X[IMAGE_CONTAINER]");  
table([1,1],[10,20],{"name":"z_luitable","title":"LIQUID UI TABLE","rows":10});  
column('Status',{'table':"z_luitable","name":"doc_push","position":2,"size":10,"label":"","  
"pushbutton":true,"fcode":"?", "process":Test});
```

Screen shot of the LUI Scripts:

Step-3: Refresh the SAP Screen.
