

## How to Enable and Retrive Logs on Liquid UI for iOS

### Pre-requisites:

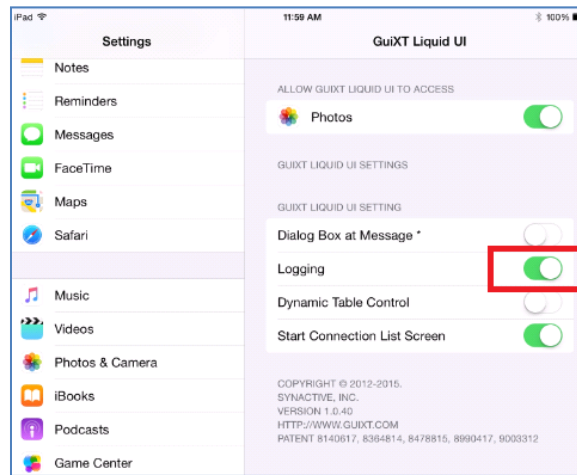

1. The Liquid UI license should be applied
2. The Liquid UI for iOS app need to be completely closed on the device.

### Steps to Enable Logs on Liquid UI for iOS

1. Open the iOS settings and click on "GuiXT LiquidUI"

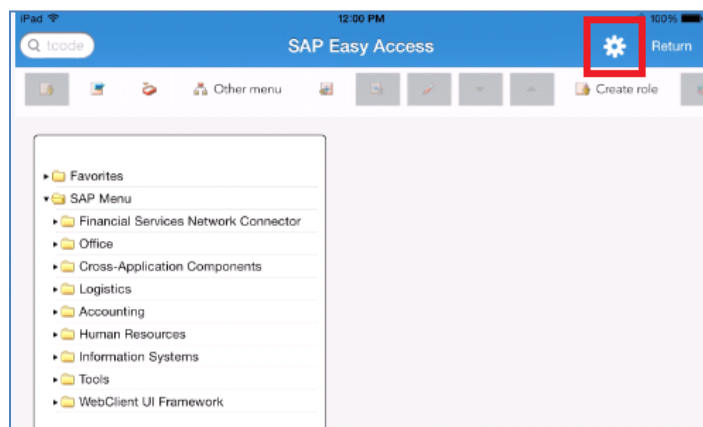

2. Click on Logging button to enable Liquid UI logging.

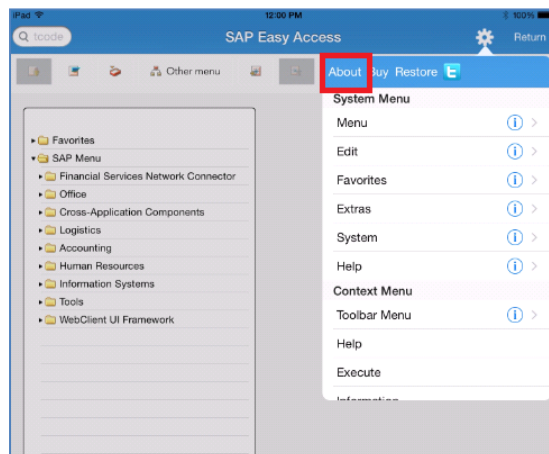

## **Retrieve and email generated logs:**

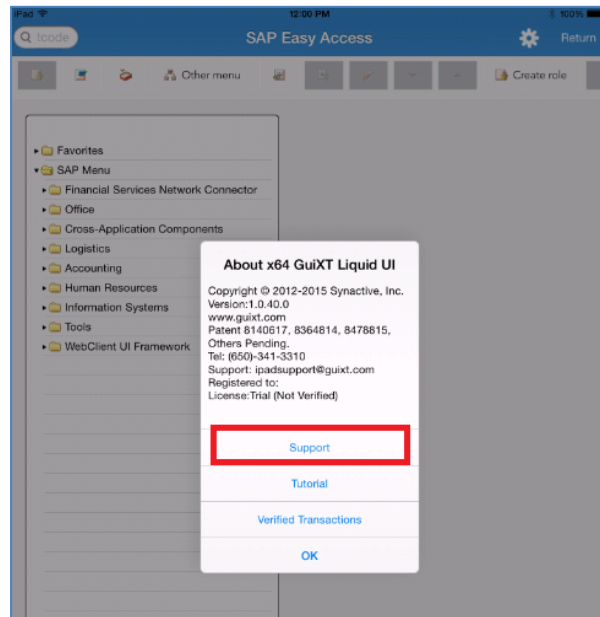

1. After completing the process and upon receiving the error, click on the *Settings* button on the LiquidUI screen.

2. Click on *About* button.

3. Click on *Support* button

4. This should open up an email with the log files attached.

5. Please address the email to [support@guixt.com](mailto:support@guixt.com)
