

LiquidUI: Message as a popup

Popup messages can be displayed using `message` command on SAP screens. Displaying messages may be useful for either educational or troubleshooting purposes.

User Interface

Log into SAP. On the easy access screen, click on Message button on the tool bar which will display a popup message.

Liquid UI Code [Script]

```
pushbutton([TOOLBAR], "Message", {"process":displaymessage,"size":[1,2]});
```

```
function displaymessage() {  
    message("Message displayed as a popup", {"type":0,"title":"information"});  
}
```
