

system variable _liststring

Purpose:

_liststring is used to read the cell value double clicked on a list screen, into a variable and to display it on the Cornelius window.

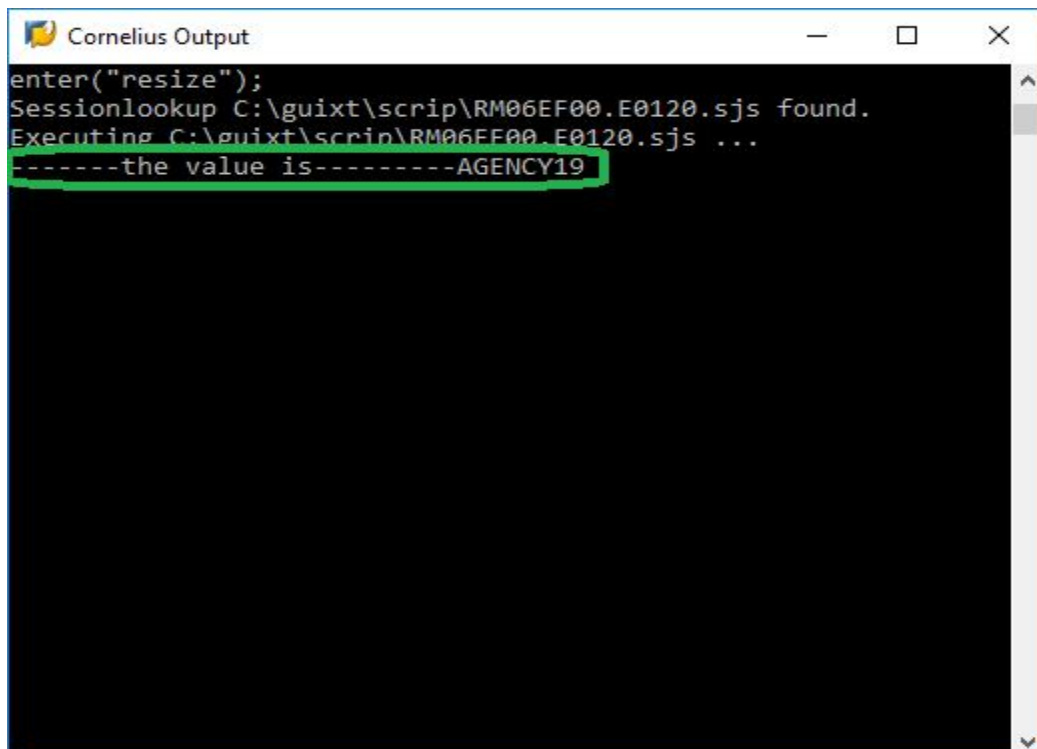

Below example explains the usage of _liststring on ME28 transaction second screen.

LiquidUI Code:

```
----- RM06EF00.E0120.sjs-----  
  
//setting the _liststring value into a LiquidUI variable  
set("V[z_ls_data]",_liststring);  
  
//variable value will be displayed on the cornelius output  
println("-----the value is-----"+z_ls_data);
```

Result Screens:

Variable value shown on Cornelius window:

```
Cornelius Output  
enter("resize");  
Sessionlookup C:\guixt\scrip\RM06EF00.E0120.sjs found.  
Executing C:\guixt\scrip\RM06EF00.E0120.sjs ...  
-----the value is-----AGENCY19
```
