## System Message Style on Liquid UI Android
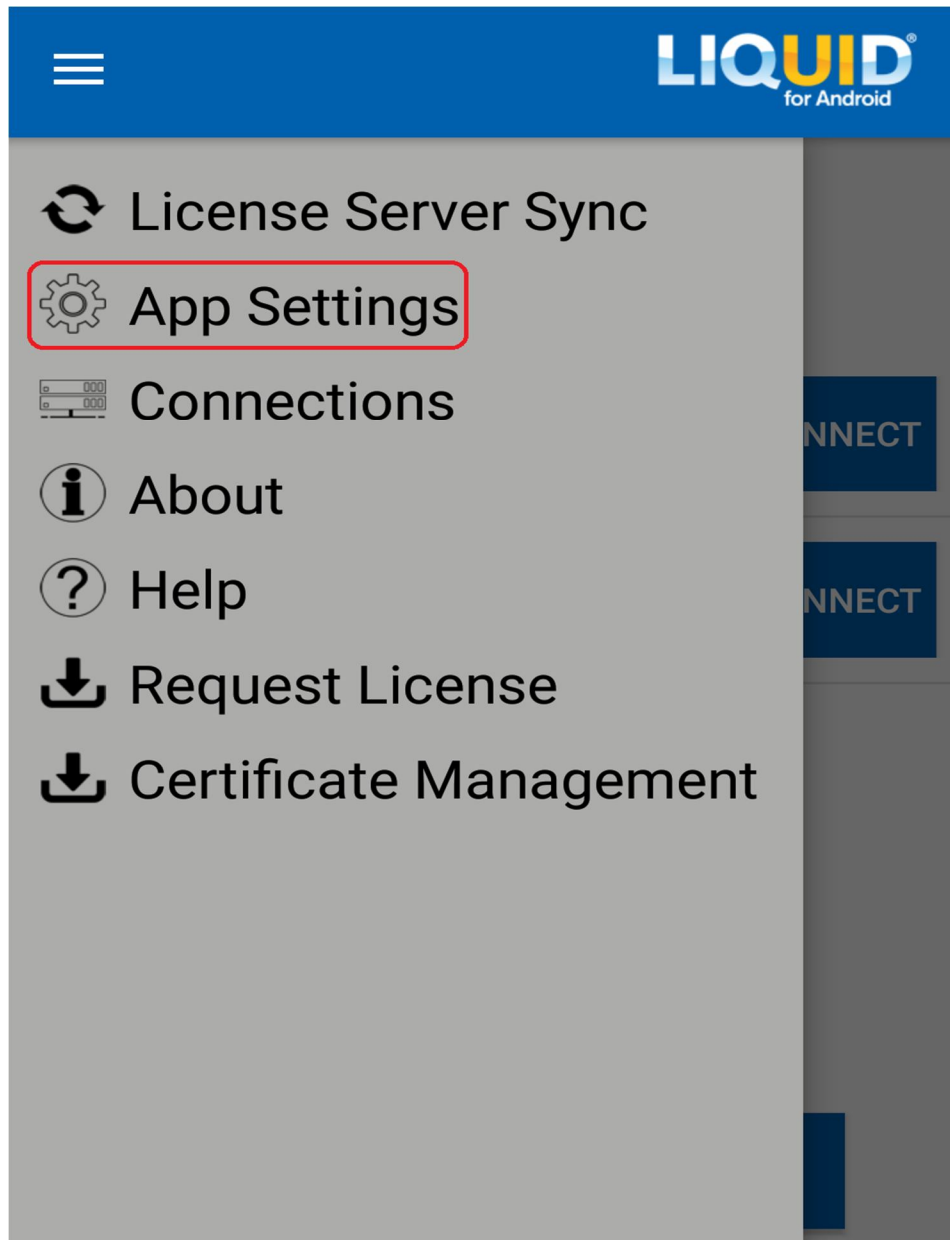

Purpose:

   As in SAPGUI Liquid UI Android also provides the user to change the display of system messages as per the convenience of the user.

Steps:

1. Start Liquid UI Android and on the connection list screen, single tap the settings icon to the left top corner – symbolically three horizontal lines.

2. Select the option "App Settings".

3. Scroll down the Insider to select the option "System Message Style".

4. Now choose any of the options based on the screen size of your device or as per the convenience.
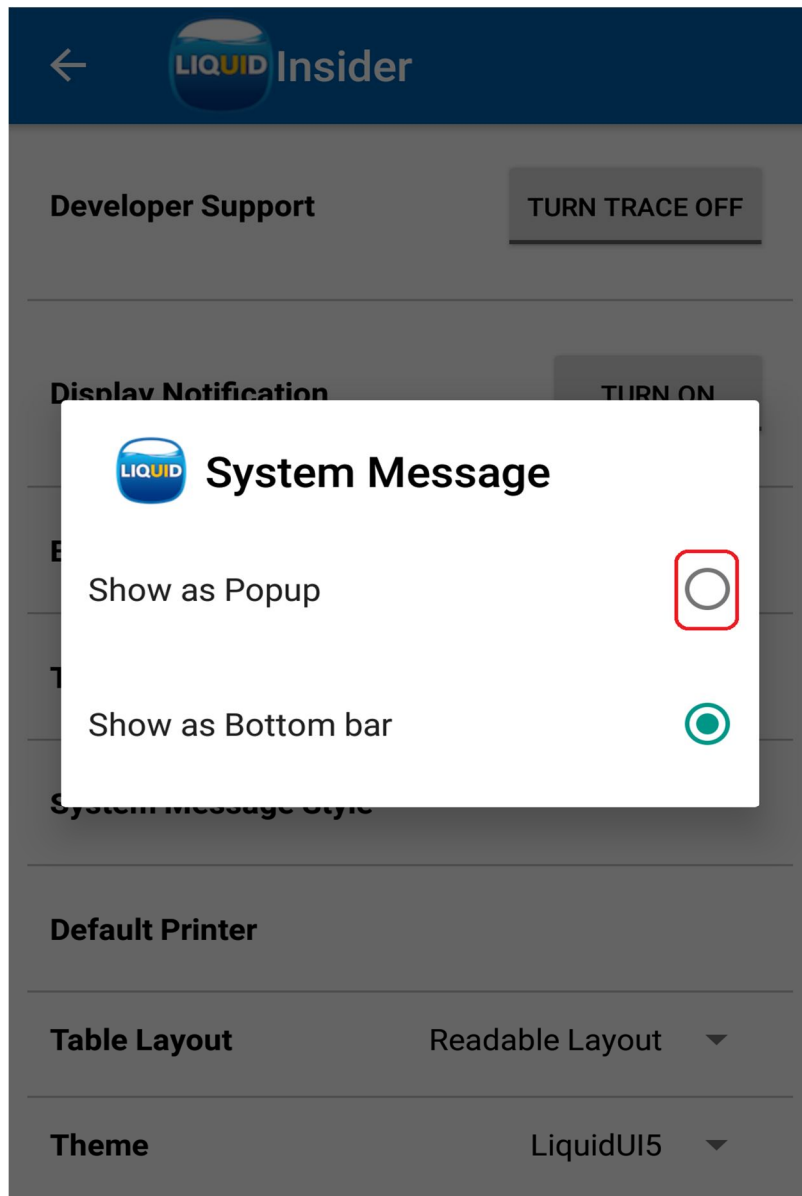

5. Navigate to the transaction to see the changes taking effect.
