Designer SY1 Files collection

Purpose: To collect SY1 files, from users' machine using Liquid UI Designer.

Scenario: When Liquid UI Engineers need to debug an issue with elements and Fields on SAPgui screens.
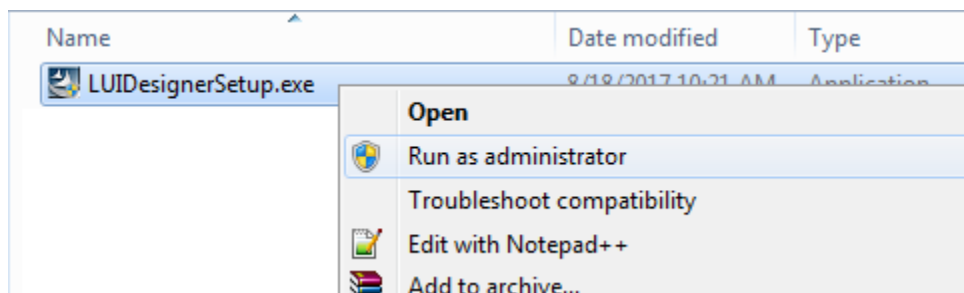

http://updates.guixt.com/secured/LUIDesignerSetup.exe

Steps to collect Designer SY1 files:

Step 1: Provide the credentials and download Liquid UI Designer Set up executable file.

Step 2: Install the Set Up file, with administrative privileges.

Right Click on Set up executable and select "Run as Administrator".

Step 3: After the install, please specify a directory1 path in GuiXT.SJS file.
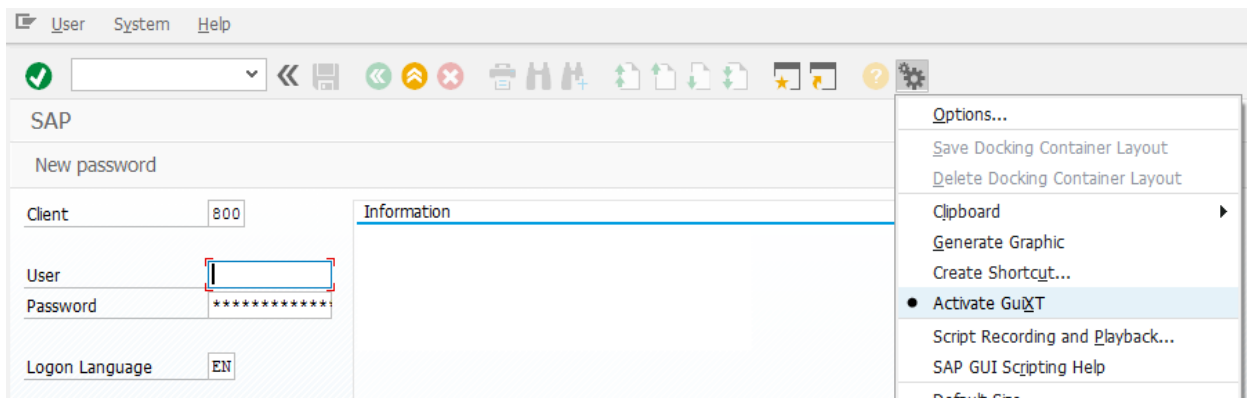

Location of GuiXT.SJS file

C:\Program Files\SAP\FrontEnd\SAPgui → 32 Bit Machine

C:\Program Files (x86)\SAP\FrontEnd\SAPgui → 64 Bit Machine

**Step 4:** Open SAPGui, navigate to desired T-Code.

Make sure that "Activate GuiXT" is checked on SAPGui.

Step 5: Navigate to Liquid UI Designer Installed folder.

Step 6: Execute Designer.exe file with administrative privileges (for the first time).

Right Click on Set up executable and select "Run as Administrator".

Step 7: Files with extensions .SY1 with ProgramName (DOT) Dynpro Number are generated.
