

Using GPS on Liquid UI IOS

Purpose:

This option helps in tracking the notification or order or document number generated by the field personnel or the end user with help of the geographical coordinates of the device.

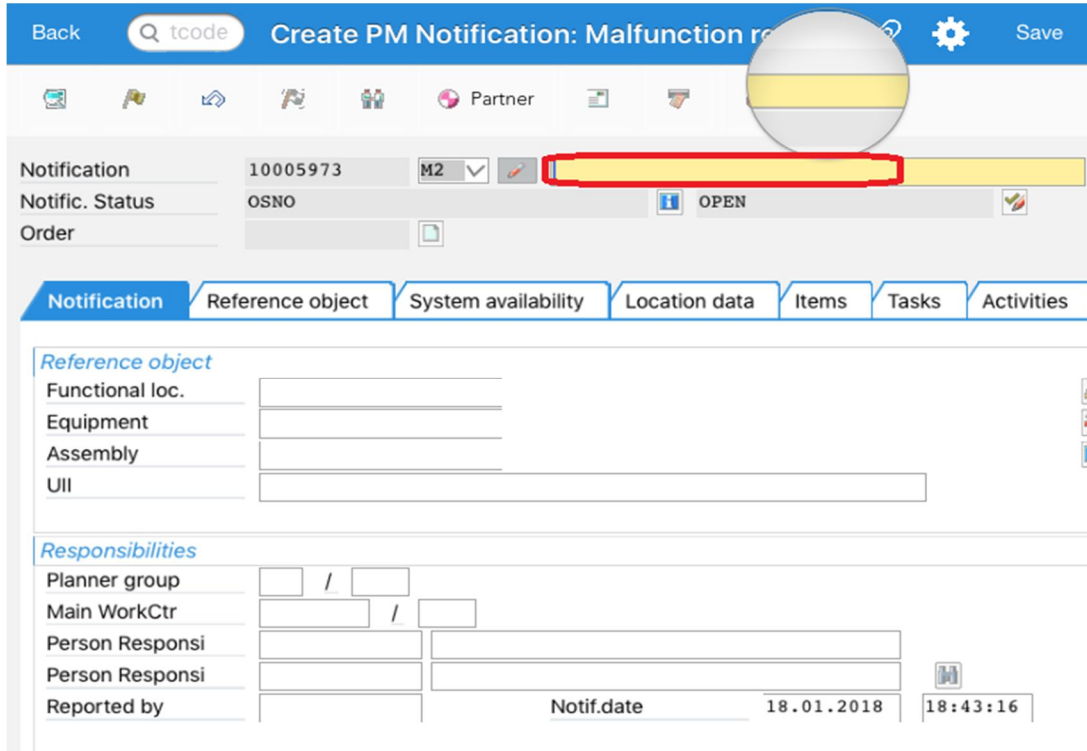

Pre-requisite:

Enable the “Location Services” from Device Settings as shown below.

Steps:

1. Navigate to any transaction.
2. Single tap and hold on the desired input field until the bubble appears.

Back | tcode | Create PM Notification: Malfunction report | Save

Notification: 10005973 | M2 | [Red bubble over location field]

Notific. Status: OSNO | OPEN

Order: [Icon]

Notification | Reference object | System availability | Location data | Items | Tasks | Activities

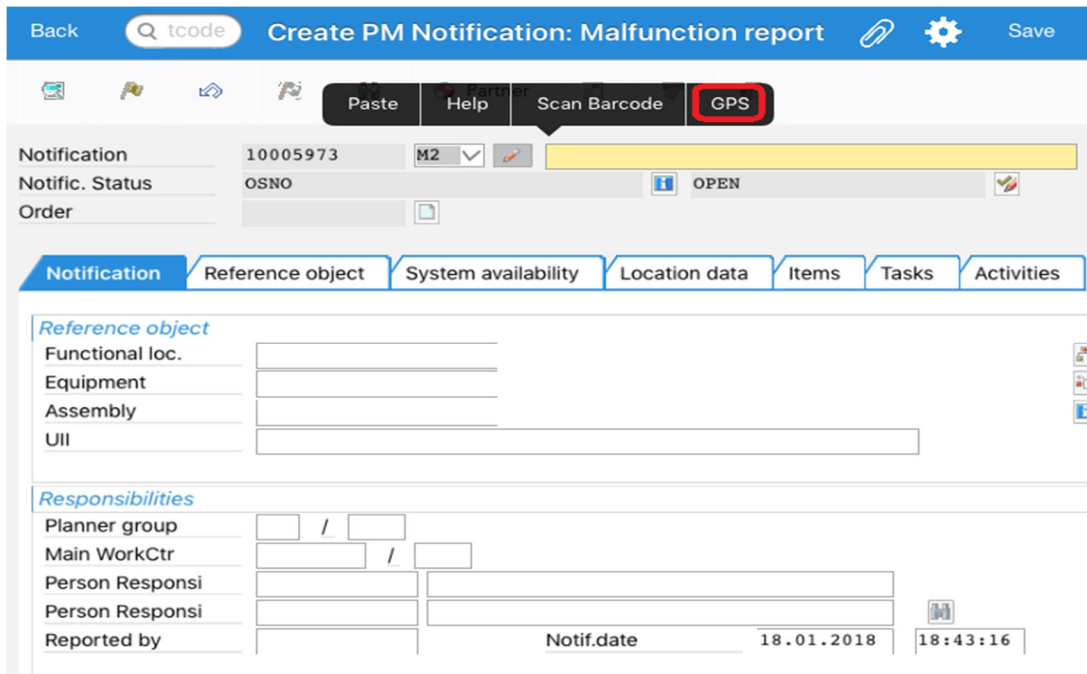

Reference object

Functional loc.: [Field]
Equipment: [Field]
Assembly: [Field]
Ull: [Field]

Responsibilities

Planner group: [Field] / [Field]
Main WorkCtr: [Field] / [Field]
Person Responsi: [Field]
Person Responsi: [Field]
Reported by: [Field] | Notif.date: 18.01.2018 | 18:43:16

3. Release the tap for the options to popup, then select “GPS”.

Back | tcode | Create PM Notification: Malfunction report | Save

Paste | Help | Scan Barcode | **GPS**

Notification: 10005973 | M2 | [Red bubble over location field]

Notific. Status: OSNO | OPEN

Order: [Icon]

Notification | Reference object | System availability | Location data | Items | Tasks | Activities

Reference object

Functional loc.: [Field]
Equipment: [Field]
Assembly: [Field]
Ull: [Field]

Responsibilities
