

Liquid UI Server Administrative Console

Version 2.0.1.0

Liquid UI Server Administrative Console allows IT personal to determine Server Operations and load.

Installation

Installation of software consists of copying Admin.exe, and setting up admin.ini file.

Admin.ini settings

Before running Admin, Admin.ini file needs to be set to point to the server that is running the Liquid UI Server.

```
[control]
proxycount=2

[proxy1]
TargetServer=LUISERVER

[proxy2]
TargetServer=localhost
```

Operation

Select the Server on the left and double click to see status. Logged in user will show up on the details panel.

The screenshot shows the Synactive Server Administrator interface. On the left, a tree view shows 'Liquid UI Servers' expanded, with 'raven' selected. The main area displays a table of active connections.

User Name	TCode	User Location	Server Name	Connection...	Port Number	Users	Connection Type	Options	Idle Time	Status
TE	SESSION_MAN...	KODIAK.guixt.com:56075	zeus	1	3200	1	WS	-progress_indi...	0:0:0	Conn

At the bottom, a status bar indicates 'Connection(s) count : 1'.

Disconnect A User

The screenshot shows the Synactive Server Administrator interface with the 'Details' view selected. A context menu is open over the first row of the connection table, which is highlighted in blue.

User Name	TCode	User Location	Server Name	Connection...	Port Number	Users	Connection Type	Options	Idle Time
UMANG	SESSION_MAN...	UD.guixt.com:54444	zeus	1	3201	1	WS		0:0:0

The context menu options are: Disconnect, Pickle, Shut down, and Designer.
