

Workbench User Interfaces

5.1.4 Workbench - Sidebar

The Workbench sidebar is located on the left hand side of the Workbench interface and appears as follows.

The Sidebar contains the Record button and the icons for the script templates. The

Workbench User Interfaces

available buttons are explained as follows.

Record

Click this icon to start or stop a recording. It corresponds to the Record command on the File menu and the Record icon in the toolbar.

Standard Template

Click this icon to generate a script based on the Standard template.

Excel Template

Click this icon to generate a script based on the Excel template.

PDF Template

Click this icon to generate a script based on the Standard template.

Offline Synchronization Template

Click this icon to generate a script based on the Offline Synchronization template.

Offline UI Template

Click this icon to generate a script based on the Offline UI template.

Custom Template

Click this icon to generate a script based on a custom template.

Note: You must install the template and configure the Workbench.sjs file in order for the template to function. Up to sixteen total templates can be installed in Workbench.
