

# SAP Materials Management Console Installation

## 2.4 Licensing MM Console

DMC licenses.

The Decision Making Console requires a valid license in order to function. Since this is a demonstration version, it will only function for a limited number of actions. Once the pre-designated number of screens has been reached, PSC will display the following message in the SAP statusline:

Demo Version: Please Contact Synactive: sales@guixt.com

To continue using the demo version after this message display, log out and log back into the DMC.

Note: A purchased version of the DMC will include a valid license and so this message will not occur.
